---

Career Summary

Senior Software Engineer with a 5-year focus on developing scalable **Python** backend systems, leveraging frameworks like **FastAPI** and **Django**. Expertise in cloud architecture (**AWS, Docker**) and a proven history of delivering high-impact solutions, including the successful architecture of enterprise driver monitoring software for over 3,000 users and achieving $15,000 in annual savings through strategic cloud optimization.

Skills - [▲ Expertise | ▲ Familiar with]

- **Languages:** Python, Typescript, Go
- **Backend:** Django, FastAPI, NodeJS
- **Frontend:** React, Angular, Flutter
- **Cloud & DevOps:** Docker, Linux, AWS
- **AI:** LangChain, RAG

Professional Experience

Consultant - KPMG Assurance and Consulting Services

India | Nov 2022 – PRESENT

- Implemented an **artificial intelligence microservice** capable of human-like chat interactions with an internal knowledge base with extendable capabilities with **MCP** tool registration adding AI capabilities to existing tools.
- Designed and developed a **serverless environment for on-demand scripts** in Python, reducing cold start times by 50% to under 10 seconds and hot start times to under 3 seconds.
- Proposed and developed a base tool with common functionalities and standard features, cutting project initiation time by 40%, saving approximately one week per project and creating a centralised utility library.
- Implemented a **standardised authentication and authorization** engine for the web backend in Django (Python) resulting in improved security and reduced integration time.

Senior Software Engineer - HTS Tech Solutions

Pune | Sept 2021 – Nov 2022.

- Architected and developed enterprise-grade driver monitoring software for over 3,000 drivers, utilising **Python (FastAPI)**, **React**, and **Docker**.
- Lead the development of android development using **flutter** team adding mobile capabilities to the possible deliverables.

Cloud Engineer Flentas Technologie PVT LTD

Pune | Jan 2021 – Sep 2021

- Created an internal cloud cost and usage reporting tool using **Python Lambda functions**, saving approximately $15,000 annually by optimising cloud spending.
- Played a key role in migrating Asia's largest IoT kitchen from on-premises to **AWS cloud**, ensuring a seamless transition and enhanced performance.

Education

Bachelor's of Engineering (Computer Engineering) SKN SITS

Lonavala | Jun 2017 – Mar 2021

- Volunteered for software training of students for industry readiness under the guidance of DSC and GDG.

Awards

- **Above and beyond** recognition for ORM implementation at KPMG
